

The World's First Biometric Password

BIO SIG-ID

Authentication

REINVENTED

Advantages of BioSig-ID™

The simplicity of a password users draw with their finger or mouse. The security of multi-factor authentication in a single product. Cloud-based, third party tested and highly affordable. When 48% of users call login “entertaining” you know you’re on to something.

Biometrics That Make Sense

- ◆ Manages identity verification with biometric accuracy
- ◆ Instead of typing a password draw it in!
- ◆ Unlike physical biometrics, reduces privacy law/hacking liability
- ◆ Ready-made forensic reports help catch fraud
- ◆ Exceeds biometric NIST standards by 300%
- ◆ Patented, third party tested proven non-invasive
- ◆ Works on any device, input with finger or mouse
- ◆ Password cannot be lost, stolen or borrowed
- ◆ No special hardware—multi-factor authentication all-in-one

Only biometric that resets like regular passwords. Collect behaviors not body images - easy to revoke and replace.

Physical biometrics can't be reset or replaced if stolen.

Secure apps: Web, device, secure purchase, ID proofing
